

Safeguarding Bulletin

ISSUE 12

Mount Kelly's Safeguarding Bulletin aims to provide parents and carers with the information needed to have informed and age-appropriate conversations with their children about potential risks in the wider world and online. This week's bulletin is on the topic of WhatsApp.

WhatsApp is the most widely used messaging platform on the planet, with over two billion users (forecast to become three billion by 2025), across more than 180 countries. The majority of those people (70%) open the app at least once a day – but what exactly are they seeing? Contact from strangers, fake news and convincing scams are all among the service's well-documented hazards.

According to Ofcom, WhatsApp is used by more than half of 3- to 17-year-olds in the UK (including one in three from the 8–11 bracket), **despite its 16+ age restriction**. If your child hops onto WhatsApp to stay in touch with friends or family, the **#WakeUpWednesday** guide to the service contains the key details you'll need to support them in doing it safely. You may also find the Internet Matters and NSPCC parent guides below useful.

What Parents & Carers Need to Know about

WHATSAPP

16+

WHAT ARE THE RISKS? With more than two billion active users exchanging texts, photos, videos and documents, as well as making voice and video calls, WhatsApp is the world's most popular messaging service. Its end-to-end encryption only allows messages to be viewed by the sender and any recipients not even WhatsApp fitself can read them. This privacy issue has been in the spotlight recently, as the UK's Online Safey Bill proposes to end such encryption on private messaging; WhatsApp is unwilling to do so and has reportedly considered withdrawing

in UK and Europe;

WhatsApp's popularity makes it a lucrative hunting ground for scammers. Recent examples include posing as the target's child, requesting a money transfer because of a spurious 'emergency'. Plus a scam where fraudsters trigger a verification message by attempting to log in to your account, then (posing as WhatsApp) call or text to ask you to repeat the code back to them object the access.

CONTACT FROM STRANGERS

the mobile number of the WhatsApp user that they want to message. If your child has ever given their number out to someone they don't know, that person could then contact them via WhatsApp. It's also possible that your child might be added to a group chat (by one of their friends, for example) containing other people that they don't know.

FAKE NEWS

WhatsApp's connectivity and ease of use allows news to be shared rapidly – whether it's true or not. To combat the spread of misinformation, messages forwarded more than five times on the app now display a "Forwarded many times" label and a double arrow icon. This makes users aware that the message they've just received is far from an original — and might not be entirely factual, either.

'VIEW ONCE' CONTENT The facility to send i messages that can

The facility to send images or messages that can only be viewed once has led to some WhatsApp users sharing inappropriate images or abusive texts, knowing that the recipient can't re-open them later to use as evidence of misconduct. People used to be able to screenshot this 'disappearing' content – but a recently added WhatsApp feature now blocks this, citing increased orivacy.

CHAT LOCK

Another new option allows users to store certain messages or chats in a separate 'locked chats' folder, saved behind a passcode, flingerprint or face ID authentication The risk here is that this function creates the potential for young people to hide conversions and content that they suspect their parents wouldn't approve of (such as age-inappropriate material).

VISIBLE LOCATION

WhatsApp's 'live location' feature lets users share their current whereabouts, which can be helpful for friends meeting up or parents checking that their child's safely on the way home, for example. However, anyone in your child's contacts list or in a mutual group chat can also track their location – potentially letting strangers identify a child's home address or journeys that they make regularly.

Advice for Parents & Carers ...TYP

EMPHASISE CAUTION

Encourage your child to treat unexpected messages with caution: get them to consider, for example, whether the message sounds like something a friend or relative would really send them. Make sure they know never to share personal details over WhatsApp, and to be wary of clicking on any links in messages. Setting up two-step verification adds a further layer of protection to their WhatsApp account.

ADJUST THE SETTINGS

It's wise to change your child's WhatsApp settings (go to 'Privacy', then 'Groups') to specify which of their contacts can add them to group chats without needing approval: you can give permission to 'My Contacts' or 'My Contacts Except ...'. Additionally, if your child needs to use 'live location', emphasise that they should enable this function for only as long as they need – and then turn it off

Help your child to understand why it's important to stop and think before posting or forwarding something on WhatsApp. It's easy — and all too common — for content to then be shared more widely (even publicly on social media). Encourage your child to consider how an ill-judged message might damage their reputation or upset a friend who sent something to them in confidence.

CHAT ABOUT PRIVACY

THINKING BEFORE SHARING

Some parents like to check in with their child about how they're using WhatsApp, explaining that it will help to keep them safe. If you spot a 'Locked Chats' folder, you might want to talk about the sort of chats that are in there, who they're with and why your child wants to keep them hidden. Also, if your child has sent any 'view once' content, you could discuss their reasons for using this feature.

Meet Our Expert

Dr Claire Sutherland is an online safety consultant, educator and researcher who has developed and implemented anti-bullying and cyber safety policies for schools. She has written verious academic papers and carried out research for the Australian government comparing internet use and secting behaviour of young people in the UK, USA and Australia.
